These prices include all local, county and state governmental fees assessed on solid waste disposed in a sanitary landfill in Ohio as of July 13, 2012.

2. **Price Includes All Costs, Including Governmental Fees.**

The price per ton for Residential Solid Waste Collection, Disposal and Recycling Services includes all direct and indirect costs, including but not limited to the costs of disposal of the Solid Waste at a licensed Solid Waste Landfill or Solid Waste Transfer Station and all Governmental Fees applicable on the generation, receipt, transfer and disposal of Solid Waste in the State of Ohio. These prices include Governmental Fees assessed on solid waste disposed in a sanitary landfill in Ohio as July 13, 2012. Should any Governmental Fees increase during the term of the Contract, the Contractor may add the amount of the increase to the per ton disposal cost charged to the City.

3. **Record Keeping**

a. **Solid Waste and Recycling Tonnages**

The Contractor must submit a monthly record of the total tonnage of Solid Waste collected and the total tonnage of Recyclable Materials collected for the preceding month. The report must be submitted with the monthly invoice to the City.

4. **Billing Service and Payment.**

The Contractor shall invoice the City for services rendered at the close of each month and the City shall pay the Contractor on or before the 10th day following the end of such month. This invoice must be sent to the attention of Accounts Payable.

5. **Fuel Adjustments**

The Contractor will apply a fuel adjustment to each monthly invoice if the price of diesel fuel increases or decreases over the established *base price* during the term of this contract. The established base price of diesel fuel is \$3.638 per U.S. gallon. This was the price of diesel fuel the week the bids were opened as reported by the U.S. Department of Energy, Energy Information Administration (EIA) *Midwest On-Highway Retail Diesel Price*.

Any fuel adjustment must be applied as either a credit or a charge as a separate line item on the invoice, using the following Fuel Adjustment Table. To determine of a fuel adjustment is warranted, the Contractor and the City will use the price index published on the US Department of Energy website www.eia.doc.gov. The price to be used is the EIA *Midwest On-Highway Retail Diesel Price*.

The fuel adjustment may only be applied to the difference in the base price of \$3.638 per gallon as posted for the last week of the billing period. The adjustment equals 0.5% for every \$.10 increase or decrease in the per gallon price of fuel above the base price. If the increase or

decrease is within a range posted on the table, then a fuel adjustment may not be applied. To calculate the adjustment, multiply the applicable adjustment percentage as shown in the following table to the total monthly invoice. This amount should be applied as a credit on the invoice if the price of fuel decreases from the base price; alternately, this amount should be applied as a charge on the invoice if the price of fuel increases over the base price. If Note that the Fuel adjustment formula will continue to be applied at the same incremental rate if the fuel price continues to rise above \$4.00 per gallon or fall below \$2.50 per gallon.
